

## UNIBOND EXTERIOR STAINLESS STEEL COMPOSITE PANEL

Unibond Stainless Steel Composite panel (USSCP) demonstrates the classic clean lines modern architecture requires. Unibond Stainless Steel Composite panel (USSCP) marries the strength and durability of stainless steel, non-combustible Polyethylene mineral fibre core (fire rated core), and an aluminium backing panel laminated with continuous high heat and pressure process. Unibond Stainless Steel Composite panel (USSCP) can be used for many applications to enhance interior and exterior architectural details, wall decorations, facade cladding. Besides economy, ease of installation Unibond ACP has the other advantages you have seen Unibond Aluminium Composite Panel (ACP) demonstrate:

- Optimised weight
- High flexural strength
- Low thermal expansion
- Improved noise insulation
- Flatness
- Superior machinability
- Environmentally friendly
- High mechanical resistance against wind, impact, shock and pressure
- Scope of design and application

Unibond EXTERIOR PE & Unibond EXTERIOR FR Panel Sizing / Weight	
Standard Size:	4mm (T) X 980(W) X 2440mm (L)
Maximum Width:	980mm
Maximum length:	3.6m
Optional Thickness:	3mm - 4mm
Face Thickness:	0.30mm – 0.5mm
Unibond INTERIOR Panel Sizing / Weight	
Standard Size:	3mm (T) X 980mm(W) X 2440mm (L)
Maximum Width:	980mm
Maximum length:	3.6m
Optional Thickness:	3mm - 4mm
Face Thickness:	0.30mm – 0.5mm

Beside Unibond Stainless Steel Composite panel (USSCP) Unibond Exterior and Interior is also capable of delivering a wide variety of multi-metal and timber compositions for every creative architectural design:

- Galvanised Steel
- Titanium
- Zinc (new product)
- Copper (new product)
- Aluminium Alloy
- Timber (new product)
- Petina copper (new product)

### Aluminium Composite Panel with Optional Metal Finishes (ACP)
