

UNIBOND EXTERIOR ZINC COMPOSITE PANEL

Unibond Zinc Composite Panel (UZCP) demonstrates the classic clean lines modern architecture requires. Unibond Zinc Composite Panel (UZCP) marries the strength and durability with a non-combustible Polyethylene mineral fibre core (fire rated core), and a aluminium backing panel laminated under continuous high heat and pressure process. Unibond Zinc Composite Panel (UZCP) can be used for many applications to enhance interior and exterior architectural details, wall decorations and facade cladding. Unibond Zinc Composite Panel (UZCP) encompasses positive material properties like economy and ease of installation. It also has the other advantages that have been demonstrated in Unibond Aluminium Composite Panel (ACP)

- Optimised weight
- High flexural strength
- Low thermal expansion
- Improved noise insulation
- Flatness
- Superior machinability
- Environmentally friendly
- High mechanical resistance against wind, impact, shock and pressure
- Scope for design and application

Unibond EXTERIOR PE & Unibond EXTERIOR FR Panel Sizing / Weight	
Standard Size:	4mm (T) X 980(W) X 2440mm (L)
Maximum Width:	980mm
Maximum length:	3.6m
Optional Thickness:	3mm - 4mm
Face Thickness:	0.30mm – 0.5mm
Unibond INTERIOR Panel Sizing / Weight	
Standard Size:	3mm (T) X980mm(W) X 2440mm (L)
Maximum Width:	980mm
Maximum length:	3.6m
Optional Thickness:	3mm - 4mm
Face Thickness:	0.30mm – 0.5mm

Beside Unibond Zinc Composite panel (UZCP), Unibond Exterior and Interior is also capable of delivering a wide variety of multi-metal and timber compositions for every creative architectural design:

- Galvanised Steel
- **Stainless Steel (new product)**
- Titanium
- **Copper (new product)**
- Aluminium Alloy
- **Timber (new product)**
- **Patina copper (new product)**

Aluminium Composite Panel with Optional Metal Finishes (ACP)
